PROFESSIONAL SUMMARY

Entry-level Data Scientist with hands-on experience in end-to-end analytics, machine learning, and AI solution development. Strong proficiency in Python, and predictive modeling with proven ability to translate complex analytical outputs into clear business insights. Adept at collaborative development, client-facing communication, and contributing to AI-led digital transformation initiatives in consulting environments.

EDUCATION

M.Tech – Data Science

Rajalakshmi Engineering College , Chennai

2025- Present

SGPA: 8.57 (Till 1st Sem)

B.Tech – Computer Science and Engineering (Artificial Intelligence & Machine Learning)

Vels Institute of Science, Technology & Advanced Studies (VISTAS), Chennai

2021 – 2025

Final CGPA: 7.6

Higher Secondary Certificate (HSC) – 80%

Velammal Matriculation School, Mogappair | 2021

Secondary School Certificate (SSC) – 76.6%

Daniel Thomas Matriculation Higher Secondary School, Chennai | 2019

TECHNICAL SKILLS

- **Programming Languages:** Python
 - **Databases & Tools:** MongoDB, HTML, CSS
 - **Machine Learning:** Regression, Classification, SVM, ANN, Random Forest
 - **Deep Learning:** CNN, OpenCV, Computer Vision
 - **Data Analytics:** EDA, Feature Engineering, Data Visualization, Model Evaluation
 - **Tools & Frameworks:** Streamlit, Flask, MediaPipe
 - **Professional Skills:** Communication, Team Collaboration, Problem Solving, Project Management
-

INTERNSHIP EXPERIENCE

Data Science / Python Developer Intern – E-Commerce Chatbot Project

MDQuality Apps Solutions

Feb 2024 – Apr 2024

- Worked as a Data Science / Python Developer Intern on an AI-powered e-commerce chatbot project, contributing to backend development using Python and Flask, web scraping with BeautifulSoup, MongoDB database management, data cleaning and validation, Excel-based reporting automation, and collaborative testing and debugging to improve customer interaction, product discovery, and data-driven business insights.
-

PROJECT EXPERIENCE

Research paper summarizing and Questionnaire tool

Mar 2026 – May 2026

- Developed a “Research Paper Summarizing and Questionnaire Tool” using NLP, Retrieval-Augmented Generation (RAG), LangChain, FAISS, Sentence Transformers, and LLMs to automate research paper summarization, semantic retrieval, and intelligent question-answer generation from PDF documents.
- Built a Streamlit and FastAPI-based application with PDF text extraction, preprocessing, embedding generation, semantic similarity search, and AI-powered contextual responses, improving research accessibility, document understanding, and academic productivity.

Smart Fitness Coach 2.0: AI-Powered Fitness Dashboard with Real-Time Workout Tracking (UG Final Phase 2 Project)

Jul 2024 – Apr 2025

- Developed “Smart Fitness Coach 2.0,” an AI-powered fitness dashboard using Computer Vision, CNN, OpenCV, MediaPipe, and Streamlit for real-time workout tracking, pose estimation, exercise classification, and AI-driven performance monitoring.
- Implemented joint angle analysis, repetition counting, posture correction, webcam-based motion tracking, and personalized fitness feedback to enhance workout accuracy, user engagement, and real-time exercise guidance.

ACHIEVEMENTS

- UG Final Year Project “**Smart Fitness Coach: AI-Powered Workout Guidance and Real-Time Form Correction**” selected under Tamil Nadu State Council for Science and Technology student project proposal initiative.

CERTIFICATIONS

- NPTEL – Big Data Computing
 - NPTEL – Cloud Computing and Distributed Systems
 - Project Internship Certification
-
